## WHO AM I?

Software Engineer with 10+ years of experience in software development. Experienced in both defining and following best practices, making architecture decisions and communicating with partners and clients.

Very adaptable to different areas and technologies such as 3D applications, desktop, backend, frontend, databases, DevOps and Infrastructure.

Likes to be challenged.

## EXPERIENCE

03/2012 – now

### Software Engineer/Senior Software Engineer

Abyssal S.A.

Abyssal provides 3D Visualization, Simulation and Digitalization capabilities for subsea operations. Worked to build most of the software ecosystem.

- Design desktop applications architecture and build them in WPF and UE4.
- Design and implement data synchronization mechanisms.
- Design and implement backend services and frontend (SPA).
- Design and deploy AWS infrastructure as code.
- Work with PostgreSQL databases.
- Implement CI/CD solutions.
- Review patents before submission.
- Define and plan products roadmap.
- Client contact for technical demonstrations and systems integration.
- Define and review development best practices.
- Describe software development practices and the full ecosystem architecture in audit-like events for partners.

C# / Python / C++ / TypeScript

2010 – 2012

### Software developer

NDrive

NDrive develops turn-by-turn GPS.

Worked to build and deliver NDrive v11, including its first tablet port. Was also part of the initial teams that rewrote NDrive from scratch for its next major release.

C++ / Objective-C / Cocoa Touch / Java

## EDUCATION

July 2018

### VISUM 2018 - VISION Understanding and Machine intelligence

INESC TEC

VISUM is a summer school about Computer vision and machine Learning. It is comprised of lectures from industry and academia and hands on exercises.

It also has a challenge where teams compete with each other, which **our team won**.

2004 – 2010

### Master in Informatics and Computing Engineering

Faculty of Engineering of the University of Porto

Advanced instruction in Informatics and Computation Engineering.

Master Thesis - "Exploiting Opponent Behavior in Multi-agent Systems"
